Rackspace Private Cloud is powered by OpenStack® and delivers the agility and efficiency of a public cloud combined with the enhanced security, control and performance of a dedicated environment. It can be deployed in your data center or ours, is managed by our OpenStack experts and backed by Fanatical Support®. Rackspace Private Cloud gives you all the power of the cloud without the pain of running it, so you can focus on your core business.

The Rackspace Private Cloud Advantage

![Scalability with Availability](image)

Rackspace Private Cloud is designed to power enterprise production workloads and includes:

- Industry-leading 99.99% OpenStack API uptime guarantee
- High availability derived from a professional-grade four server control plane which includes a clustered database and messaging service
- Security components and controls to provide enhanced protection – physical firewalls, easy-to-use access controls and audit logs for reporting requirements.
- Designed to scale to hundreds of nodes allowing you to start small and grow seamlessly

![Application-level Automation](image)

Use automation to unlock the full power of your cloud. Rackspace Private Cloud is deployed using Ansible software, supports OpenStack Orchestration and can be combined with our Rackspace DevOps Automation Service¹ to help automate your application environment by treating your infrastructure as code. Our automation capabilities help you:

- Improve efficiency and deployment quality by automating the provisioning of your infrastructure, services and applications
- Maintain focus on your core business functions by automating routine tasks and workflow procedures
- Eliminate inconsistencies and increase operational efficiency by syncing your development and production environments
- Keep track of your environment and application health using advanced monitoring and analytics

![Expertise](image)

We co-founded OpenStack with NASA and are the OpenStack experts that:

- Manage one of the world’s largest OpenStack-powered clouds
- Are number one in all-time code contributions to the OpenStack project²
- Have five OpenStack Project Technical Leads (PTLs) and over 25 Core Contributors to key projects like Nova, Keystone and Marconi³
- Offer an extensive OpenStack training curriculum, covering topics ranging from an introduction to OpenStack to Neutron networking

Ready for Your Enterprise Production Workloads

**Fanatical Support**
Our exceptional customer support means we’re in it with you every step of the way. Rackspace Private Cloud is backed with Fanatical Support that includes:

- A dedicated account manager and dedicated OpenStack engineer\(^4\) who know the specifics of your private cloud environment
- 24x7x365 access to our team of experts
- Proactively monitor and maintain the health of your private cloud around the clock
- 15-minute live response time guarantee to any emergency ticket with Core support
- 100% network uptime guarantee and one-hour hardware replacement at no cost when hosted in a Rackspace data center

**Hybrid**
Need the capability to automatically leverage public cloud resources for unexpected demand? Leverage the Rackspace Managed Cloud hybrid portfolio consisting of private cloud, public cloud and dedicated hosting to:

- Add elasticity to your infrastructure with the capability to automatically add and remove public cloud resources as needed
- Get the best fit for each of your applications
- Monitor your deployments through a single pane of glass using Rackspace Cloud Intelligence

**Deploy Anywhere**
Rackspace Private Cloud is a flexible solution offering you the ability to:

- Deploy anywhere in the world. You can host Rackspace Private Cloud in your data center, in our data center or in both
- Choose between nine data centers in six different regions across the globe when hosting at Rackspace
  - The six regions include Chicago, Dallas, Northern Virginia, London, Hong Kong and Sydney
- Choose between multiple support options to best meet your needs

Rackspace Private Cloud provides a complete managed private cloud solution – powered by OpenStack, designed to support enterprise production workloads, managed by our OpenStack experts and backed by our award-winning Fanatical Support.
