ARMOR

Rackspace Technology combines forces with Armor for modern SOC-as-a-Service solutions.

Reduce your risk with expert SOC services for cloud monitoring, threat detection and incident response.

The shift to modern architectures and remote workforces, coupled with evolving compliance mandates, has dramatically increased the threat profile of organizations. To handle threats effectively, enterprises need a partner that provides managed Security Operations Center (SOC) services for threat intelligence, security analytics, alerts and response services together into a solution that can be easily deployed and managed across multicloud environments.

Proven cybersecurity technology packaged with a team of cloud security experts

Rackspace Technology has the right tools, people and processes to help ensure your cloud applications and data are secure 24x7x365— plus access to our consultative cloud and security practices. By combining the comprehensive Armor Anywhere security platform with the industry-leading multicloud security expertise found at Rackspace Technology, you'll get SOC services that your business can rely on around the clock for advanced threat protection and incident response.

Rackspace Technology offers assessments to identify security gaps in your environment against industry benchmarks and compliance mandates (such as FFIEC, GLBA, PCI-DSS, HIPAA, HITECH, FedRAMP, FISMA) — including consultative services to help design, build and fully manage a defense-in-depth architecture for unified protection across your multicloud environments.

Drive new leads to your pipeline

Rackspace Technology and Armor offer security assessments that can be customized and implemented for your team to drive new business leads and better understand your prospect's environment.

Why Rackspace Technology™

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 2,500+ cloud engineers
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 120+ countries
- HITRUST CSF-certified dedicated hosting environment
- Certified Level 1 PCI Service Provider on AWS
- 1,600+ AWS technical certificates worldwide
- AWS Security Hub Partner
- Google Cloud Platform Security Specialization
- IDC- and Forrester-recognized security practices
- State-of-the-art global security operations center with locations in EMEA and North America
- 400+ network and security experts available around the clock
- 500+ industry certifications earned including CCNAs and GIACs in Cyber Defense, Digital Forensics & Incident Response, and Penetration Testing

Enterprise-grade multicloud security services

Rackspace Security Essentials combines industry-leading global security expertise from our global SOC with the advanced threat detection capabilities of Armor Anywhere for a service that businesses can rely on to protect all of their cloud environments around the clock.

- **Threat Detection:** Get advanced protection against cyber-threats through an integrated suite of security capabilities including intrusion detection systems (IDS), anti-virus/malware protection, file integrity monitoring (FIM) and vulnerability scanning.
- **24x7x365 SOC-as-a-service with incident response:** Put Rackspace Technology security experts to work for you. Your security alerts are ingested into a Security Information and Event Management (SIEM) platform for analysis by GIAC-Certified Incident Handlers (GCIH) in a state-of-the-art, global SOC. Certified Rackspace Technology SOC experts act as a security force multiplier for your in-house teams, detecting possible compromises and responding to issues around the clock.
- **Compliance support:** Log data is stored for up to 13 months to support compliance requirements. For additional support, Rackspace Technology Compliance Assistance experts can help define, manage and validate the Governance Risk and Compliance (GRC) goals that are important to your business.
- **Swift, multicloud deployments:** Deploy security in minutes with our lightweight agent that requires no hardware, making it best suited to fortify all of your cloud environments — even those not currently managed by Rackspace Technology.
- **Proactive detection and response services:** Gain additional protection against advanced persistent threats (APTs) in your Rackspace Technology managed environments. This service includes all of the Rackspace Security Essentials features plus host-based endpoint detection and response, proactive remediation services with rapid incident response times, cyber hunting services, detailed analytics and reporting and more.

When it comes to security and compliance, you don't have to go it alone. Rackspace Technology can help you address every element of your security and compliance journey — removing that burden from your in-house teams.

“Armor, part of the new Proactive Detection and Response offering, will help as it should catch everything — it enhances our existing security portfolio and will seamlessly run across Google Cloud and our own servers, but limit our vulnerability.”

Ari Shotland :: Chief Technology Officer, Plus500

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.
