

Managed Public Cloud Solutions for Google Cloud

Support for your IT operations evolution to help you embrace the modern cloud.

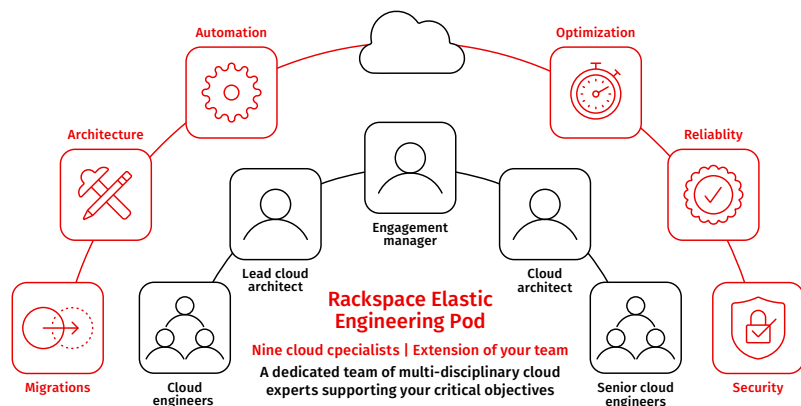

The cloud has been critical in launching products quickly, reliably and ahead of the competition. However, the true opportunity of the cloud is much greater. Today, IT organizations are realizing that the cloud isn't just another trend, but a key component for achieving digital transformation.

Wherever you are in your cloud journey, you're likely facing a roadblock or two that prevents you from unlocking the benefits of the modern cloud. Whether your team is adopting new architectural methodologies, new ways to deploy, monitor and operate, or even new concepts such as containers, serverless, IoT and machine learning, you need more than just IT support.

That's where Rackspace Technology comes in. As traditional barriers between build and operate break down, accelerating innovation via the cloud, requires more than traditional managed services models that were built for the boundaries of the past.

Introducing Rackspace Elastic Engineering

Rackspace Elastic Engineering gives you on-demand access to a team of highly skilled, multi-disciplinary engineers who will work alongside your team to collaboratively drive your cloud outcomes, while continuously evolving your environment. Rackspace Elastic Engineering supports a broad range of cloud service, including building, migrating, optimizing and managing your Google Cloud Platform® (GCP) instance.

Complimentary services for Rackspace Elastic Engineering

Advanced Monitoring & Resolution (AMR)

AMR blends decades of experience with your specific requirements to ensure your cloud environment is performing as expected — 24x7x365. Our trusted team of experts helps you expect and prepare for the unexpected.

VM Management services

VM Management lets you maintain your traditional operations, while automating patching and backup across your environment. With flexible GCP pricing models, you can scale back your VM management costs as you evolve your workloads.

Cloud optimization

Optimizer+ provides a continuous cycle of cloud optimization, helping you manage your cloud presence by offering insights through resource reporting and analysis for spend optimization.

A game-changing portfolio for Google Cloud Platform

About Rackspace Technology®

We are your partner as you navigate the complex and ever-changing world of cloud adoption. We leverage our expertise with the world's leading technologies to enable you to grow your business, increase efficiency and deliver the future.

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 2,600+ certified experts
