

# A Rackspace Government Solutions PaaS offering gives FedRAMP Moderate inheritable controls to a large government contractor in Atlanta, GA

## Challenge

This customer needed a FedRAMP (Federal Risk and Authorization Management Program) environment to host a key training application.

## Solution

Rackspace Technology offered a managed, secure and compliant Amazon Web Services (AWS) platform, including STIG OS, backups, common, vulnerability management, session recording and Host IPS. Rackspace provided 60% of all required controls.

## Achievement

We delivered a fully compliant, secure and managed PaaS on AWS that gives the customer about 80% of the controls required by FedRAMP. The PaaS enabled the customer to achieve FedRAMP authorization faster and with less effort.
