

Cloud Data Management Capabilities Assessment

Empower your organization with enhanced data security, compliance, accessibility and efficiency.

Whether your organization has already designed a Center of Excellence and data strategy, or is trying to move from a departmental to enterprise-level data strategy, we can help you with the processes, training, enablement, technology and cloud best practices to revolutionize your business.

Rackspace Technology will help you evaluate your current data and AI program using our Cloud Data Management Capabilities (CDMC) Assessment framework. The CDMC Assessment is a high-level check to benchmark your current technology, people and processes against the enterprise-grade CDMC framework used by Fortune 500 data teams.

Experts Dedicated to Your Success

Our cloud data experts can provide guidance and recommendations for every phase of your data lifecycle to improve overall reliability, efficiency and cost-effectiveness. Our robust CDMC framework addresses several pillars across your organization, including process, security, governance, technology blueprints and people enablement.

Project Structure

Duration	Description		Fee
5 hours	Access and review	Remediation	\$5K
	Review current processes and practices	Pillars of improvement	\$5K hyperscaler funding (subject to hyperscaler approval)
	Current tooling review		Total \$0
	CDMC workshops		

Key Benefits

With a Cloud Data Management Capabilities Assessment, you can expect to gain these benefits:

- **A well-defined strategy**
- **Review and recommendations**
- **Access to Rackspace Data experts who will review and provide guidance specific to your organization's data needs**
- **Improvements in data scalability, security, collaboration, disaster recovery, cost savings and compliance**

Deliverables

You'll receive the following during your CDMC Assessment:

- 30-minute introductory call
- Two 2-hour CDMC workshops
- Review of the initial report
- Recommendations for high-impact pillars of improvement
- Estimate for proposed improvement
- Define data operating model table of contents
- Follow up call after CDMC meeting

Take the Next Step

Let's talk about how Rackspace Technology data services expertise helps you achieve your cloud data goals.
