

FinOps Assessment Workshop

Gain insight into cloud costs and get on the path to optimized Google Cloud spend.

Digital transformations go together with financial transformations. When making the shift to cloud resources, there are financial considerations around how the cloud will impact your organization as you pay-as-you-consume versus traditional capital expenses.

Unfortunately, many organizations in the cloud struggle to control costs, facing common cloud spend challenges such as:

- Budget overruns
- Lack of visibility into the drivers of spend
- Lack of an agile process to develop and maintain cost visibility across cloud environments
- Trouble understanding and implementing a framework to start financial operations governance
- Inadequate budget forecasting to meet business demand

The Rackspace FinOps Assessment Workshop provides insights into current governance practices, highlights potential configuration gaps and provides a roadmap to optimal cost savings.

Key Benefits

- Develop/review financial governance framework and best-practices, including high-level strategies for managing Google Cloud financial resources
- Automate reporting at scale to deliver real-time cost insights
- Align financial and technical teams on Google Cloud consumption and strategic business goals
- The Rackspace Technology model balances governance, financial accountability and business innovation outcomes over a two-day workshop, engaging cross functional stakeholders in your organization.

Workshop Overview

This workshop will provide the foundational knowledge to begin navigating your financial operations journey.

Workshop timeline

Day 1-3 	Day 4-5 
We'll focus on business strategies and a financial governance framework.	We'll review high-level findings from the data collection activities and executive readout.

Deliverables: We will provide a documented overview of a financial governance framework, high-level baseline recommendations and next steps in your financial governance journey.
