Get started with a COMPLIMENTARY Strategy Session to scope your MVP and learn how a modern data platform can accelerate your path to becoming a truly data-driven organization.
Proven delivery methodology to lay the foundation of your modern analytics platform

**Discovery and Planning**
- Understand key objectives and define high value business and IT use cases.
- Analyze current data infrastructure to understand data sources, complexities, risks and blockers.
- Review data model, security and ingestion requirements.

**Design and Build**
- Create a design of the modern data architecture.
- Define ingestion patterns, data pipelines and schema.
- Build the modern data solution for the initial use case along with the data platform foundations.

**Ingest and Transform**
- Set up the required services for ETL.
- Establish required connection with data sources while maintaining security requirements.
- Automate the ETL pipelines.

**Data Warehouse Modeling**
- Define the final output and design EDW schemas and models.
- Prepare data for analytics by performing queries and analysis.
- Hand off the MVP Modern Data Platform and communicate key value.

**Reporting and Analytics**
- Create final reports and dashboards.
- Perform final updates to code and documentation.

**Duration:** 8 Weeks (Production) or 3 Weeks (POC)

**Cost:** $150k+ $35k+

---

**Collinson**

"Rackspace Technology helped us ensure the security of the platform, and that we would secure PCI compliance in record time. The team was always open to share information, gaining our confidence with board and bank."

Ravisankar Sundararaj, Head of Software, R&D/IT Services, Collinson

**Metro Bank**

"Knowing that our team of Rackspace experts is readily available to support us gives me the peace of mind that I can concentrate on delivering genuine business value without jeopardizing any of the day to day tasks that keep the business running."

David Gould, Head of Architecture and Solutions, Metro Bank
