Data Design Lab for Azure

Accelerate your journey to data modernization in just one week.

To use data in different ways, you first need to process and store data in a new way. For customers with large volumes of data, this can be daunting, especially considering what's involved — moving to a new or modernized data environment and managing custom machine learning needs, analytics demands and real-time data streaming.

With the Data Design Lab for Azure, Rackspace Technology can help create tangible deliverables on Microsoft® Azure® that accelerate modernization initiatives, including data, analytics, AI, machine learning, serverless and more.

Key Benefits

Our Data Design Lab gives you a faster path to production and deeper knowledge of data and analytics services, including:

- **Database modernization**
- **Extract transform and load (ETL) migration and modernization for batch and streaming**
- **Data platform for ad-hoc querying, visualizations and advanced analytics**
- **Data lake modernization for managing and processing data more effectively**
- **Graph analytics**
- **Machine learning**

With a Data Design Lab, you can expect to gain:

- **A well-defined strategy**
- **Accelerated progress for creating tangible deliverables**
- **Access to Rackspace Technology data experts who will provide architectural guidance before you start building**
- **Partner funding**

About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 2,500+ Microsoft certifications, including MCITPs, MCSAs, MCSEs and MCTSs
- Five-time Microsoft Hosting Partner of the Year
- Microsoft Gold Certified

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Take the Next Step

Let's talk about how Rackspace Technology data expertise helps you achieve your modernization goals.

Project Structure

Duration	Description		Fee
1 week	Discovery	Design	$10K
	Use case selection Current system review Define goals	Create future-state architecture	$10K Azure funding (subject to Azure approval) Total $0

Deliverables

You'll receive the following during your Data Design Lab:

- Future-state architecture diagrams
- Future-state documentation
- High-level future-state backlog activities
- Proposal for follow-up implementation engagement
