

Rackspace Financial Services Solutions for FinTech

Gain multi-cloud solutions built for organizations focused on delivering non-traditional financial services.

New payment systems, peer lending networks and other emerging finance products depend on both innovative delivery models and enhanced security to meet the requirements of a shifting regulatory landscape. To avoid the expense and risk of infrastructure management, FinTech firms need a trusted partner to help them meet compliance regulations, stay competitive through innovation and evolve the digital customer experience.

To solve these challenges, many FinTech organizations are managing their cloud solutions with Rackspace®. They are gaining a partner who understands how to create and maintain a secure and compliant environment.

Experts Dedicated to Your Success

Secure multi-cloud and hybrid solutions from Rackspace help FinTech firms implement new and agile delivery methods. Cloud experts focus on meeting emerging regulations and scaling for growth, so you are free to spend more time growing your business. Rackspace solutions provide flexible IT-as-a-Service (IaaS) options on the latest technologies and across applications, data, security and infrastructure — all tailored to the needs of the FinTech industry.

Key Features

Rackspace offers a range of fully managed, third-party public cloud services designed specifically to help FinTech organizations stay secure and compliant, including these robust key features:

Big Data: The big data experts at Rackspace can guide you through the entire big data transformation lifecycle — including planning, design, development, support and operation of the platform and IaaS.

Security, Governance, Risk Management and Compliance: PCI, ISO, SOC and FISMA compliant solutions, as well as disaster recovery and business continuity solutions, address different financial regulations in multiple regions.

Colocation and On-Premises Management: Secure your hardware in Rackspace world-class data centers or leverage its expertise in on-premise environments.

Advisory Services and Migration: Full assessments of your IT architectural landscape, including deployment planning, risk assessments, migration planning, execution and legacy decommissioning.

Management and Optimization: Workload assessments to help prioritize and plan cloud migration, including architectural and cloud readiness analysis, and software-defined hybrid clouds.
