

RACKSPACE FINANCIAL SERVICES SOLUTIONS FOR FINTECH

Multi-cloud solutions built for organizations focused on the delivery of non-traditional financial services.

New payment systems, peer lending networks and other emerging finance products depend on both innovative delivery models and enhanced security to meet the requirements of a shifting regulatory landscape. To avoid the expense and risk of infrastructure management, FinTech firms need a trusted partner to help them meet compliance regulations, stay competitive through innovation and evolve the digital customer experience.

WHY RACKSPACE FOR FINTECH?

Secure multi-cloud and hybrid solutions from Rackspace help FinTech firms implement new and agile delivery methods. Our experts focus on meeting emerging regulations and scaling for growth, so you can spend time growing your business. Our solutions provide flexible IT as a Service options, on the latest technologies, across applications, data, security and infrastructure tailored to the needs of the FinTech industry.

KEY FEATURES

We offer fully managed, third-party public cloud options designed for FinTech with the following features:

Big Data: Our big data experts can guide you through the entire big data transformation lifecycle – from planning, design and development, to support and operation of the platform and IaaS.

Security/Governance, Risk Management and Compliance: PCI, ISO, SOC and FISMA compliant solutions as well as disaster recovery and business continuity solutions throughout multiple regions to address different financial regulations.

Colocation & On-Premises Management: Secure your hardware in our world-class data centers or leverage our expertise for on-premises environments.

Advisory Services and Migration: Full assessments of your IT architectural landscape, including planning and risk assessments, migration planning and execution, and legacy decommissioning.

Management and Optimization: Workload assessment to help prioritize and plan cloud migration, including architectural and cloud readiness assessments and software-defined hybrid clouds.
