Application Security

Improve the security and performance of your web apps with enterprise-class WAF, DDoS and CDN solutions.

Your web applications are critical to your business as they serve as a main source of your revenue transactions and customer interactions. Web applications are also the top target for cyber attacks. Organizations need protection against well-known threats and DDoS attacks — all while optimizing web and mobile application delivery to their end users.

Rackspace Technology offers a portfolio of application security solutions that include everything your business needs to improve the performance, security and reliability of your web and mobile applications, backed by around the clock support from certified security experts.

Experts Dedicated to Your Success

Rackspace Technology understands the cloud security and compliance challenges you face. With dedicated teams of security experts that have been helping companies like yours strengthen security for more than 20 years, Rackspace Technology is ready to help you navigate this journey with solutions built on industry-standard, best-practice frameworks. For organizations that need hands-on application security support, certified Rackspace Technology experts can provide onboarding support, configuration, policy set-up, tuning and 24x7x365 support while also providing expert consultative services to help with custom deployments of advanced policies and features.

Key Benefits

Reduce your risk and provide your users with an optimal web and mobile application experience.

- Secure websites against cyberattacks in real time
- Address PCI compliance needs
- Reduce downtime caused by DDoS attacks
- Deliver a fast and reliable web experience for your users
- Protect against account takeover, advanced bot attacks and API threats
- Leverage cloud-based delivery to protect any environment — on-premises or in the cloud — on AWS, Azure and Google Cloud Platform

Key Features

Rackspace Technology offers industry-leading WAF solutions with CDN, DDoS protection and other advanced features for enterprise-class performance and protection against the most sophisticated security threats, backed by 24x7x365 support from our certified security experts.

- **Web application firewall:** Real-time protection against OWASP Top 10 threats, like SQL injection, cross-site scripting, illegal resource access and remote file inclusion. We offer solutions that are pre-tuned to immediately block, with zero false positives.

- **Advanced bot protection:** Combat automated attacks from scrapers, spammers and malicious bots, with options to detect attempts to perform account takeover via credential stuffing — without interfering with legitimate human users.

- **DDoS protection:** Protect against the largest targeted attacks on networks, applications and DNS servers — without incurring latency or interfering with legitimate users.

About Rackspace Technology®

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- A Leader in the 2020 Gartner Magic Quadrant
- for Public Cloud Infrastructure Professional and
- Managed Services, Worldwide
- 2,500+ cloud engineers
