

Rackspace Service Blocks: Cloud Native Security for AWS

SOC-as-a-Service for your native AWS security products

With the increase of cloud native security tools available in Amazon Web Services (AWS), many businesses are faced with analyzing and responding to this data in a timely manner. That's where Rackspace Technology can help.

Experts Dedicated to Your Success

Rackspace Technology security experts help with strategic planning for best practice cloud security, tactical day-to-day security monitoring and threat analysis to deter, detect and respond to potential threats around the clock. And all of this from certified security experts in our global Rackspace Security Operations Center (SOC).

Key Benefits

Add a SOC to your AWS cloud environment with a non-intrusive deployment and usage-based pricing.

By integrating directly with AWS security tools, Rackspace Cloud Native Security services provide around-the-clock monitoring and rapid remediation of security threats in your AWS environment including the following:

Deployment & Management: Rackspace Technology can deploy and configure supported AWS security tools into your AWS environment and provide ongoing management according to your business needs.

24x7x365 Monitoring & Response: Get around-the-clock monitoring, advanced analysis and threat remediation from certified security experts in the Rackspace Technology SOC.

Comprehensive Security Visibility: Data from your supported AWS security tools will be integrated into our Security Information and Event Management (SIEM) system, for a comprehensive view of threats across all of your environments with Rackspace Managed Security Services.

AWS Security Expertise: Rackspace Technology is the first pure Managed Security Service Provider (MSSP) Partner for AWS Security Hub, offering consulting services for AWS native security tools that you can't get anywhere else.

About Rackspace Technology™

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

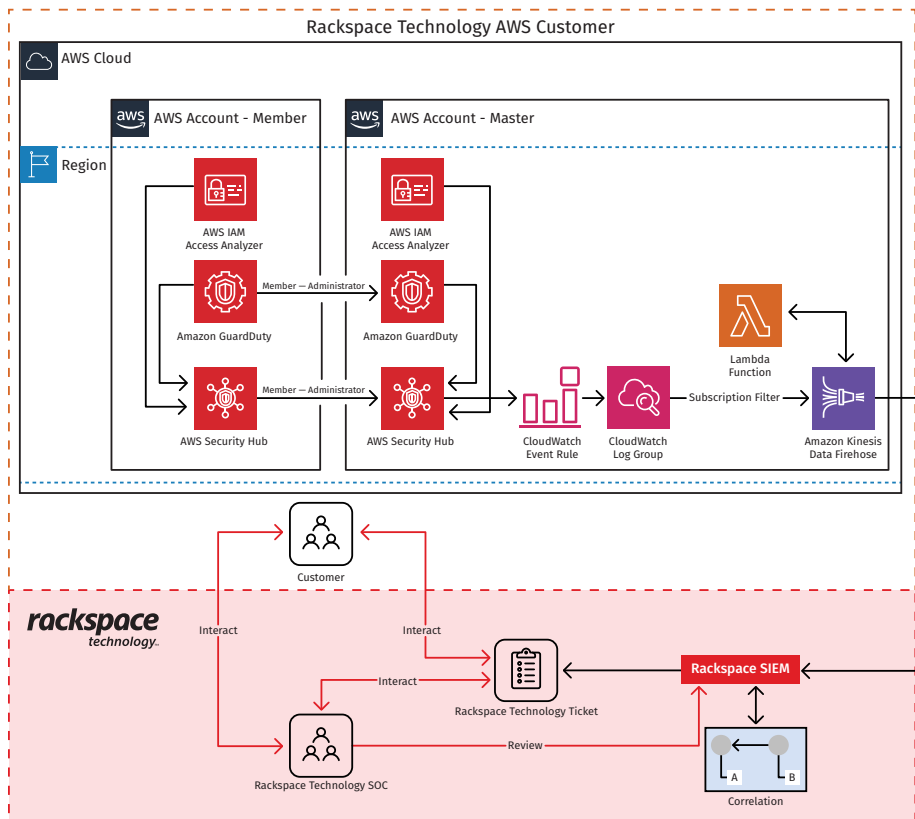

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
