

Rackspace Data Services for Business Intelligence

Get more insight from your data.

How confident are you that your business is extracting maximum value from the data it generates? If you aren't fully utilizing the data generated within your organization, you could be missing out on opportunities to apply this business intelligence (BI) to improve your business processes and reduce your operating costs.

Rackspace can help you use your business intelligence solution to gain valuable insights from your data — and turn these insights into actions by initiating and integrating business processes within your organization.

Experts Dedicated to Your Success

Rackspace has over 15 years of experience implementing, managing and supporting customer solutions based on the leading business intelligence application stacks from Tableau, Qlik, Oracle, SAP and Microsoft and offers:

- Assessments and roadmaps
- Data warehouse and integration
- Dashboards, analysis and reporting

Key Features and Benefits

Managed Infrastructure: Enjoy flexible hosting options for your business intelligence solutions and choose the solution that meets your business requirements for a scalable infrastructure:

- Fully managed dedicated servers (in a Rackspace data center)
- Single-tenant private cloud (in your own data center, or a service provider's)
- Dedicated server connected to a private or public cloud (hybrid cloud)

Rackspace managed hosting services include servers, operating systems, storage, backups, networking and security.

Managed Applications: Rackspace expertise extends beyond infrastructure to the business intelligence applications your business uses every day. Leverage industry-leading expertise to manage — and provide ongoing support for — your business intelligence applications.

Rackspace supports you by:

- Offering best-practice guidance
- Implementing and supporting features and functionality
- Answering questions, troubleshooting and resolving issues

Managed Application Services for leading business intelligence applications include functional support for business processes, customization, consulting and database administration.

Customized Solutions: Certified experts are always available to help you customize your business intelligence solution and work with you to:

- Assess ways to architect and optimize your solution
- Define key metrics and analytics to measure and report on
- Create a strategic roadmap for implementation
