

Data Center Breakout Solution

Simplifying your exit from the data center.

As you prepare for an IT transformation or advance your current cloud journey, you may find that leaving the traditional on-premises data center makes sense for your business. Transitioning can free you from the burden and costs of data center and infrastructure management. You can be more responsive to changes within your organization, industry and the world at large, such as new product and strategic digital initiative developments. Rackspace specialists help you navigate, operate and optimize your infrastructure, data and applications — so you can maximize your cloud investments.

Experts Dedicated to Your Success

The Data Center Breakout Solution from Rackspace can simplify your exit from the data center. You'll receive the guidance and ongoing support you need to make the transition, while reducing costs, optimizing your IT spend, simplifying your IT management and securing your environment — all without re-architecting your applications. As your trusted partner, Rackspace provides expertise for daily management needs, routine maintenance, and security requirements to deliver seamless multi-cloud solutions — based on two decades of security, performance and scaling expertise.

Key Features

With Rackspace, you can move beyond your data center with confidence. Our specialists take care of every detail, every step of the way, helping reduce your overall migration risk. Our solution provides a simplified path for organizations ready to leave the data center, but not yet ready to modernize their apps and infrastructure for cloud platforms.

Professional Services and Migration Planning: Receive a comprehensive assessment of your architectural footprint, plus a customized cloud strategy that addresses your current and future unique challenges and provides a migration plan to get you there.

Server Virtualization: Whether you lack the expertise or want to offload daily management needs, Rackspace fully managed VMware® Server Virtualization and Microsoft® Hyper-V solutions help you focus on your core business. The solution includes backup, recovery and uptime guarantees, all supported by certified professionals.

Security and Compliance: Protect your data and address compliance requirements with proactive threat detection, fast remediation and simplified reporting through the 24x7x365 Rackspace Customer Security Operations Center (CSOC) staffed by GCIA- and GCIH-certified security analysts — with the Rackspace 100% Network Uptime Guarantee.

Database Services: Reduce the pressures of database optimization, maintenance and troubleshooting on your internal staff through access to on-demand guidance from certified database administrators.

Rackspace Application Services (Recommended): Improve customer experience, create differentiation in the market and reduce costs with comprehensive professional and application management services from Rackspace. Solutions include enterprise resource planning, business intelligence, ecommerce and web content management, customer relationship management, email and productivity.
