

Data and AI Maturity Assessment

Accelerate your journey to data fluency and enable data-driven decisions.

To help organizations measure the maturity of their data analytics architecture and processes, and identify gaps and opportunities for improvement, Rackspace Technology offers comprehensive solutions that empower data-driven organizations by combining the Well Architected Review for Data with the Cloud Data Management Capabilities (CDMC) Assessment framework.

By leveraging Rackspace Technology expertise, organizations can develop a roadmap to align their data strategy with their business goals, gaining a holistic understanding of their data pipelines, models and workflows.

The Data and AI Maturity Assessment focuses on evaluating data and AI architectures and includes these actions:

- **Governance:** Align data strategy with business objectives, governance, risk management and compliance.
- **Cost optimization:** Reduce costs and increase value by choosing the right services and scaling resources to minimize data duplication.
- **Performance efficiency:** Improve user satisfaction by enhancing data processing speed, scalability, partitioning and caching.
- **Operational excellence:** Automate and monitor data operations, testing and consistency.
- **Security:** Protect data confidentiality, integrity and availability by using encryption, authentication, authorization, auditing and policies.
- **Reliability:** Ensure data availability and durability by using backups, replication, fault tolerance and recovery.

This approach offers a unique opportunity for organizations to enhance their data strategies and facilitate the optimization and success of data-driven operations.

Key Benefits

With the Data and AI Maturity Assessment, you'll gain the following benefits:

- **A well-defined strategy**
- **A review session with recommendations**
- **Access to Rackspace Technology data experts who will provide guidance to help meet your specific data needs**
- **Funding by hyperscale cloud provider (if qualifications are met)**

About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 3,200+ certified technical experts
- Customers in 120+ countries

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Project Structure

Duration	Description		Fee
8 hours	Access and review	Remediation	\$5K
	<ul style="list-style-type: none">Review current processes, practices and/or workloadsCurrent data architecture, DataOps processes and data governance process review	Pillars of improvement	\$5K hyperscaler funding (subject to hyperscaler approval) Total \$0

Deliverables

- 30-minute introductory call
- 8-hour workshop
- Initial report review
- High-risk items or improvement recommendations for remediation
- Estimate for proposed improvement and remediation
- Request for hyperscaler funding credit

Take the Next Step

Let's talk about how Rackspace Technology data services expertise helps you achieve your cloud data goals.
