

DevOps Maturity Assessment

Gain organisational alignment and an actionable plan to help gain greater business agility.

DevOps has quickly evolved from a paradigm shift to a prominent driver in helping organisations fulfill the promise of business agility. Organisations that have fully embraced the core principles of DevOps are winning in the marketplace by mastering software delivery at scale and delivering superior customer experiences.

On the other hand, organisations that have lagged on deploying DevOps are suffering from these common business challenges:

- An inability to select and implement a DevOps program
- The lack of a common language for discussing the value of DevOps
- An unclear roadmap for future DevOps initiatives
- Lack of or unclear value-stream mapping
- Lack of knowledge on maximising the value of cloud investments and selecting the right tools
- An inability to enable team structures that can rapidly enhance knowledge and capabilities

If you're still struggling with DevOps, our DevOps Maturity Assessment can help. Our experts assess your DevOps readiness — including architecture, coding, team and culture. This comprehensive offer can help meet you where you are — and provide a clear plan to get you where you want to be sooner.

Experts Dedicated to Your Success

While technology implementation is fundamental to a DevOps maturity journey, Rackspace Technology focuses on a complete DevOps transformation that includes people and processes. Recognising that one size doesn't fit all, our specialists help define and implement the ideal DevOps solutions for organisations based on industry best practices and each company's unique business needs.

In the DevOps Maturity Assessment, our specialists will assess your current-state maturity and desired-state, develop a customised DevOps maturity roadmap, and scope a DevOps pilot for a proof-of-value initiative — before scaling DevOps across your organisation.

As your DevOps partner, we will embed within your team in all phases of the DevOps maturity journey — from vision through execution. We'll help ensure you attain measurable business outcomes aligned with your organisation's strategic objectives.

About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 3,200+ certified technical experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 120+ countries

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Key Benefits

When you launch our DevOps Maturity Assessment, you stand to gain these benefits:

- The right DevOps approach based on a deep analysis of your organisation
- Training from our DevOps specialists on how to gain organisational alignment around your DevOps go-forward plan
- Actionable roadmaps on how to implement DevOps and achieve your organisation's desired end-state
- A co-creation value stream map to help you get past gaps and roadblocks on your DevOps journey

Key Features

Gain industry-leading DevOps advantages with our DevOps Maturity Assessment, including:

- **Expertise from our trusted advisors:** Rackspace Technology DevOps specialists bring industry-leading best practices and experience to every project, including DevOps adoption, maturity and scaling.
- **Unbiased, platform-agnostic strategies:** We provide unbiased, but opinionated, vendor-neutral strategies that align with your unique business needs.
- **DevOps maturity kickstart:** No matter how complex your current-state challenges are, our DevOps specialists can help you move forward in your DevOps journey with confidence — and also help position you for long-term success.
- **Actionable and focused recommendations:** We collaborate with you to outline your DevOps vision, assess your current-state capabilities, and develop an actionable plan with future-state capabilities that address your top priorities and maximise your business agility.

Key Activities and Outcomes

Our DevOps Maturity Assessment provides you with the follow high-value deliverables:

- **A maturity assessment:** Our specialists assess your current-state maturity against industry best practices using a comprehensive maturity assessment framework that focuses on architecture and coding, continuous integration, continuous deployment, on-demand releases, business outcomes, team and culture, and continual learning.
- **Value-stream mapping:** We will conduct value-stream mapping workshops with your product team to help them understand and document your current-state production process, including the bottlenecks and gaps that are preventing you from realising your desired future-state.
- **DevOps maturity roadmap and pilot scope:** We'll collaborate with you to define an actionable and prioritised roadmap that will help you realise your desired future-state, including scoping a pilot DevOps transformation to provide proof-of-value — before scaling DevOps your organisation.
- **Assessment Deliverables:**
 - DevOps Maturity Report
 - DevOps Maturity Roadmap
- **Typical Timeline:**

Our typical DevOps Maturity Assessments take four to 12 weeks to execute. However, we can also work within your timeline requirements. Talk to a specialist to determine the ideal timeline for your organisation.
