

# RackSpace Elastic Engineering for Security on Azure

A dedicated pod of security experts solving your Microsoft Azure security and compliance challenges.

The constant evolution of cyberthreats, and the race for more sophisticated tools to combat them, has resulted in a security landscape that changes quickly. Now more than ever, it is critical to understand your vulnerabilities and assemble the right solutions to strengthen and secure your environments. And the best way to do that is through the implementation of a cutting-edge security program focused on continuous improvement and backed by deep expertise.

## Experts Dedicated To Solving Your Microsoft Azure Security Challenges

RackSpace Elastic Engineering for Security provides an end-to-end digital transformation for security, modernizing business security strategy and cloud security operations. Your Elastic Engineering for Security pod partners with your business every step of the way to assess, architect, implement, engineer, monitor, manage, and respond to complex challenges based on your security and compliance goals.

Each dedicated security pod includes an engagement manager, a pod lead and lead architect, security architects, security engineers, a compliance expert, and security analysts/penetration testers.

## Key Features

**Security architecture and engineering:** Your pod can design, build and fully manage a defense-in-depth architecture for unified protection across your multicloud environments, including Microsoft® Azure®, Azure Security Center and other Azure security offerings.

**Threat and vulnerability assessments:** Your pod can provide cloud security vulnerability scans to assess cloud configurations and policies to identify settings that don't align to industry benchmarks and best practices.

**Compliance management and support:** Your Elastic Engineering for Security pod can work with you to define, manage and validate your governance, risk and compliance (GRC) requirements through advisory scans and assessments for compliance mandates, such as PCI DSS, HIPAA, and more.

## About RackSpace Technology®

RackSpace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 2,600+ certified experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 120+ countries
- Azure Expert MSP
- Five-Time Microsoft Partner of the Year
- 2,300+ Microsoft certifications worldwide
- 800+ Microsoft Azure certifications
- IDC- and Forrester-recognized security practices
- 800+ security certifications, including 100+ cloud security certificates from Microsoft Azure; and other cloud providers

## Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, RackSpace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

**Risk management and remediation:** Security experts work as an extension of your team to assess and reduce risk in your environment. When a security incident occurs, your pod will work with your security operations team to design and implement security controls to remediate threats and help prevent similar incidents in the future.

### Key Benefits

- **“Do-with” approach to security:** Your Rackspace Elastic Engineering for Security pod works in an agile, sprint based model alongside your team.
- **Flexible, tiered pricing:** Purchase monthly blocks of hours-based tiers with the ability to scale up and down should your business needs change.
- **Expertise where you need it:** Rackspace multicloud security experts have deep knowledge and experience in not only security but cloud security and hold 800+ security industry certifications — including 100+ cloud security certifications from, Microsoft Azure, and other cloud providers.

### Take the Next Step
