

Rackspace Technology Financial Services Solutions for Investment Firms

Multicloud solutions built for investment firms focused on buying, selling and trading in high-net-worth and high-volume capital markets.

Investment firms are turning to innovative, multicloud delivery models to increase shareholder value, improve customer service and support innovation, while adhering to ever-tighter security and compliance requirements. To avoid the expense and risk of transformation and ongoing infrastructure management, they need a trusted partner to help meet compliance regulations, speed time-to-market and implement agile infrastructure to support high-performance processing.

To solve these challenges, many investment firms are managing their cloud solutions with Rackspace Technology. They are gaining a partner who understands how to create and maintain a secure and compliant environment.

Experts Dedicated to Your Success

Multicloud and hybrid solutions from Rackspace Technology help investment firms reduce time-to-results, improve and extend compute capabilities to generate intelligence, and access multicloud flexibility with the confidence that their systems and applications are hosted in a secure, compliant and highly scalable environment. Rackspace Technology solutions provide flexible IT-as-a-Service (IaaS) options on the latest technologies and across applications, data, security and infrastructure — all tailored to the needs of investment firms.

Key Features

Rackspace Technology offers a range of fully managed, third-party public cloud services designed specifically to help investment firms which include the following key features:

Big Data: The big data experts at Rackspace Technology can guide you through the entire big data transformation lifecycle — which includes planning, design, development, support and operation of the platform and IaaS.

Security, Governance, Risk Management and Compliance: PCI, ISO, SOC and FISMA compliant solutions, as well as disaster recovery and business continuity solutions, address different financial regulations in multiple regions.

Management and Optimization: Workload assessments to help prioritize and plan cloud migration, including architectural and cloud readiness assessments and software-defined hybrid clouds.

Advisory Services and Migration: Full assessments of your IT architectural landscape, including deployment planning, risk assessments, migration planning, execution and legacy decommissioning.

Colocation and On-Premises Management: Secure your hardware in Rackspace Technology world-class data centers or leverage its expertise in on-premises environments.
