

Rackspace Financial Services Solutions for ISVs

Gain the broadest portfolio of managed IT services and expertise to support ISVs that serve the financial services industry.

To reach increasingly diverse marketplaces, speed up deployment time and create more predictable revenue streams, software vendors for financial services organizations need a trusted partner to guide them through the digital transformation process.

To solve this challenge, many ISVs are managing their cloud solutions with Rackspace. They are gaining a partner who understands how to create and maintain a secure and compliant environment.

Experts Dedicated to Your Success

Secure multi-cloud and hybrid solutions, along with expert guidance, help ISVs tackle the challenges of digital transformation — including operational support, security, compliance and assimilation of rapidly evolving technologies. Financial services ISVs choose Rackspace to help them securely run cloud-based applications, simplify IT operations, maximize IT resources and manage extreme scale to drive innovation. Only Rackspace delivers compliant digital transformation as a service on the latest technologies and across applications, data, security and infrastructure.

Key Features

Rackspace offers a range of fully managed, third-party public cloud services designed specifically to help financial services ISVs stay secure and compliant, including these robust key features:

Management and Optimization: Workload assessments to help prioritize and plan cloud migration, including architectural and cloud readiness assessments, and optimization of software-defined hybrid clouds.

Advisory Services and Migration: Full assessments of your IT architectural landscape, including deployment planning, risk assessment, migration planning, execution and legacy decommissioning.

Security, Governance, Risk Management and Compliance: Compliant solutions throughout multiple regions with different financial regulations — including PCI, ISO and SOC.

Data and Analytics: Hybrid cloud solutions with a shared analytics engine, support for integration of transactional and analytic workloads, and Spark support for analysis of both structured and unstructured data.

Disaster Recovery and Business Continuity: Increased reliability and cost savings, uptime in mission-critical scenarios, improved service levels and a more robust disaster recovery capability for the enterprise.

Colocation and On-Premises Management: Custom colocation and connectivity solutions to enhance your return on investment, while reducing your capex, opex and total cost of ownership.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2018 Gartner Magic Quadrant for Public Cloud Infrastructure Managed Service Providers, Worldwide
- 3,000+ cloud experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 150+ countries
- PCI, SOC, ISO and FISMA compliance
- AWS Financial Services Competency Partner

“By using cloud technologies, we stay ahead of the game. The complexity of our products means we have to build infrastructure. We can't do that alone, and Rackspace helps us ensure that we're in control and our procedures are always in place.”

Harry Thompson :: Founder, Kurtosys

Fanatical Experience™
