Rackspace Healthcare Solutions for Life Sciences

Reduce new product time-to-market, increase clinical trial collaboration and productivity, and protect your sensitive data.

The constant need to communicate and collaborate across research communities, combined with a strong need to reduce time-to-insight and accelerate innovation and discovery, are pushing life sciences organizations to seek greater efficiencies in the cloud. According to Gartner, one third of life sciences CIOs view business information (BI) and analytics as key technologies to enable differentiation among competitors.

As a HITRUST™ CSF certified organization, Rackspace can help your life sciences organization reach its digital transformation goals, while maintaining the highest levels of data and privacy standards.

Experts Dedicated to Your Success

Rackspace provides life sciences organizations with the tools you need to improve time-to-market for new product launches and increase collaboration and productivity across the enterprise – while securely protecting your intellectual property and sensitive protected information.

Rackspace can guide you on a path to increased efficiency across business processes, lower costs and improve data-centric decision making. Rackspace serves more than 2,500 healthcare organizations through an unrivaled solutions portfolio. With years of experience innovating across all leading cloud technologies, Rackspace gives you unbiased expertise you can trust.

Key Features

With its robust service offering, Rackspace helps life sciences organizations address security and compliance challenges, plan for business and data continuity through cloud-based disaster recovery, and gain deeper insight from their data by securely hosting even the largest data sets and visualization tools.

Big Data and Analytics: Rackspace business intelligence capabilities deliver the big data insights and predictive analytics that can help you achieve better outcomes, including predicting and preventing chronic diseases, delivering precision medicine, mapping genomes and managing population health.

Security, Compliance and Risk Mitigation: With its HIPAA-ready cloud and HITRUST CSF certification, Rackspace addresses all of your compliance needs, including PCI DSS and PHI requirements.

Managed Services: Rackspace offers end-to-end managed services across public, private, hybrid and multi-cloud environments, allowing you to move from a capex to opex spending model and freeing your staff to focus on innovation.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.
