

# Microsoft Hybrid Cloud Security Workshop, Powered by Rackspace Elastic Engineering for Security

Improve your cloud security posture with a five-week workshop and ongoing security operations support.

How good is your understanding of security vulnerabilities in your hybrid and multicloud environment, including VMs, databases and Azure storage? Are you aware of the number of suspected authentication activities across your multicloud environment? In short, how confident are you in your organization's cloud security posture?

Organizations increasingly rely on cloud services for help managing a growing volume of data while dealing with tight budgets and vulnerable legacy systems. But as the use of cloud services continues to grow, cyber risks and threats continue to evolve.

With the Microsoft® Hybrid Cloud Security Workshop delivered by Rackspace Elastic Engineering for Security, your organization gets a customized threat and vulnerability analysis of your hybrid and multicloud environment and learns how to build and operate a more robust cloud security system.

## Experts Dedicated to Your Success

With 20+ years of experience, Rackspace Technology can build and optimize solutions for your business through deep expertise with the world's leading technologies. Whether you're looking to spur innovation and agility, lower costs or build operational efficiencies, Rackspace Technology's thousands of experts are ready to put cutting-edge capabilities to work for your business.

## Key Features and Benefits

### Supplement and up-level your team's skills

- "Do-with" approach
- On-demand access to dedicated engineering resources with diverse skill sets who know your environment and goals
- Expert hands-on-keyboard management of your Azure environment
- Scale up and down monthly as business needs change

### Outcome focused

- A focus on business outcomes – not SLAs
- Document and manage security priorities and needs of your business
- Identify on-going threats and vulnerabilities in your environment
- Prioritize and mitigate threats to your servers, data and services
- Reduce the attack surface for hybrid workloads

### On-going innovation

- Progressive business transformation
- Accelerate your security journey leveraging and staying current with a cloud-native collection of security solutions
- Continuously review and optimize security operations to meet business outcomes and objectives

## About Rackspace Technology®

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 2,600+ certified experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 120+ countries
- 2,300+ Microsoft certifications, including MCITPs, MCSAs, MCSE and MCTSs
- Named a Microsoft Azure Expert Managed Service Provider
- Five-time Hosting Partner of the Year

*"Rackspace brought a lot of knowledge, which we simply wouldn't have been able to get on our own. It has really opened its doors to us and worked as a partner, not simply a service provider."*

**Amit Patel** :: Head of Enterprise Architecture, British Heart Foundation

## Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Microsoft Partner

Azure Expert MSP

## Summary of Deliverables

Rackspace Technology can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multicloud environments, plus guidance and support for long-term improvement of your security posture. This workshop is the starting point for your dedicated Rackspace Elastic Engineering for Security pod, strengthening your organization's approach to hybrid security.

### Hybrid Cloud Security Workshop

- Analyze your requirements and priorities for a hybrid cloud security detection and response solution.
- Define scope and deploy Microsoft Defender in the production environment, onboarding servers and other selected services.
- Explore Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- Discover existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- Discover threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- Develop next steps on proceeding with Rackspace Elastic Engineering for Security and production deployments of Microsoft Defender and Azure Network Security to meet your needs and objectives.

### Transition to Rackspace Elastic Engineering for Security

The Security Workshop is used as starting point for the backlog of work your dedicated Elastic Engineering for Security pod of experts will engage with you on. Backlogs typically include:

- **Security architecture and engineering:** Design, build and fully manage a defense-in-depth architecture for unified protection across your hybrid environments.
- **Ongoing threat and vulnerability:** Cloud security vulnerability scans to assess cloud configurations and policies to identify settings that don't align to industry benchmarks and best practices.
- **Compliance management and support:** Define, manage and validate your governance, risk and compliance (GRC) requirements through advisory scans and assessments for compliance mandates.
- **Risk management and remediation:** When a security incident occurs, your pod will work with your security operations team to design and implement security controls to remediate threats and help prevent similar incidents in the future.

Improve your cloud security posture with a Microsoft Hybrid Cloud Security Workshop followed by ongoing security operations leveraging Rackspace's Elastic Engineering for Security services.

### Take the Next Step

Let's talk about how Rackspace Technology expertise helps you achieve your goals.
