

RACKSPACE MANAGED PUBLIC CLOUD

Accelerating digital transformation in the multi-cloud era.

Today's hyper-scale public clouds are catalysts for digital transformation, allowing organizations to speed innovation, respond to market demands faster and exceed ever-growing customer needs and expectations. Add in the cost effectiveness of public cloud-solutions and the question around cloud adoption is no longer "if," but "when."

However, the ever-evolving nature of the cloud, along with migration, administration, optimization and security concerns, make adoption challenging, even for the most cloud-mature organizations. We provide expert guidance to help navigate, operate and optimize the public cloud so you can focus on your core business.

WHY RACKSPACE FOR MANAGED PUBLIC CLOUD?

Organizations around the globe choose Rackspace to help navigate the journey to the cloud and accelerate digital transformation. As an industry-recognized cloud services leader, Rackspace delivers expertise, tools, and unmatched services and support to unleash the power of the public cloud. Rackspace's army of certified cloud experts supports an extensive suite of managed services across the world's leading hyper-scale cloud platforms, including:

- Amazon Web Services
- Microsoft® Azure®
- Google Cloud Platform™
- Alibaba Cloud

KEY BENEFITS

Full Cloud Lifecycle Support:

- Assessment, planning, migration and deployment
- 24x7x365 management via tooling, automation, advanced monitoring and access to certified expertise
- Cloud performance and cost optimization
- Fanatical experience: Our industry-recognized, results-obsessed culture of service, with aggressive SLAs across all platforms

Unbiased Expertise: Access to extensive experience across the world's leading clouds with unbiased, data-driven guidance from an army of certified cloud experts helps you identify the public cloud capabilities, tools and technologies that meet your specific needs.

Comprehensive Cloud Solutions: Broad portfolio of private cloud, bare-metal and SaaS offerings for comprehensive multi-cloud and hybrid cloud solutions, as well as advanced security services and application services & support.

Unified Multi-Cloud Experience: Single-pane-of-glass, cross-platform service delivery featuring centralized billing, ticketing and point of contact. Expert guidance for multi-cloud strategies including assessment, planning, design and ongoing management.
