

# Managed Hosting

Fully managed, customizable solution with enterprise-level scalability, high performance and advanced security options.

Get the control and flexibility you need to manage mission-critical and I/O-intensive applications with Rackspace® fully managed, single-tenant, dedicated environments.

## Experts Dedicated to Your Success

When you need to meet complex security and compliance requirements in a physically isolated, single-tenant environment, Rackspace has you covered. Its dedicated hardware is built to optimize performance for high I/O needs supported with high-strength security and compliance.

## Key Benefits

Rackspace experts will design and build your solution according to your unique needs, and support your operation backed by the following high-performance benefits:

**Highly Customizable:** Across drive types, memory, CPU, protocol types, controllers and expansion shelves, Rackspace can provide the best solutions for your goals.

**No Retooling Non-Cloud Native Applications:** Rackspace runs your applications in a similar environment to eliminate the need to retool or refactor legacy apps and data.

**Reduce Costs:** Better manage your costs with Rackspace economies-of-scale and experience hosting thousands of customers in data centers around the world.

**Optimize for Performance:** Customized configurations give you the control and flexibility you need to tune your infrastructure for maximum performance.

**Application and Security Services:** Advanced application support and security services further reduce your operational burden.

**Maintain Focus:** Speed innovation by offloading IT infrastructure, so that you can focus on your core competencies and high-value activities, like app development.

**Security and Compliance:** Single tenancy provides higher levels of security to help comply with PCI-DSS, HIPPA, SOX and FISMA guidelines.

**Flexible Support Options:** Three SLA levels to support your managed hosting environment: managed, intensive and colocation.

**99.99% Uptime SLA:** Best-in-class, enterprise-ready technology backed by an industry-leading SLA.

## Services Delivered Your Way

Rackspace has been a leader in managed hosting for nearly two decades and currently serves customers on five continents and across dozens of data centers. Rackspace delivers exceptional service and support built on these strengths:

**OpenStack® Expertise:** Rackspace co-founded OpenStack with NASA and has more than 1 billion managed server hours of OpenStack experience across public and private clouds.

**Industry Leadership:** #1 cloud provider for the world's top 1,000 websites, according to *Internet Retailer*.
