

Rackspace Managed Pivotal Cloud Foundry

Gain a fully managed, cloud-native platform that lets your developers focus on generating value for your customers.

Most organizations want to deliver application features faster and more efficiently while modernizing their architectures, but getting there isn't always easy. Pivotal Cloud Foundry (PCF) allows developers to create, test and deliver software faster by automatically deploying application code in multi-cloud environments, including on-premises or in a private or public cloud. Rackspace® fully supports and manages your PCF platform, including running and proactively monitoring PCF to ensure optimal performance — all while your in-house team focuses on innovation and getting to market quickly.

Experts Dedicated to Your Success

Rackspace engineers have deep experience managing workloads at scale across leading public and private clouds. They'll work with your developers and technical subject matter experts to deliver a highly performant, highly available PCF platform. They can also help shorten your software delivery cycle with a platform designed to reduce the time and cost of managing deployment and operations.

With Rackspace expertise and scalability behind you, your team can focus on your core competencies and reduce the many risks that come with deploying across multiple platforms.

Key Benefits

Rackspace Managed Pivotal Cloud Foundry provides a fully managed, production-ready service that addresses the operational complexity of PCF, the scarcity of PCF expertise and the challenges of optimizing performance at scale.

Focus on Core Business: Rackspace engineers will manage all PCF operations, allowing you to focus on building and quickly deploying apps.

Platform of Choice: With Rackspace's unrivaled portfolio and experience across all leading clouds, customers can choose the right platform for their workloads — whether it's a private or public cloud, hybrid or on-premises infrastructure.

Faster Time-to-Value: Rackspace's team of experts can successfully and quickly implement PCF faster than DIY implementation, allowing you to deliver software more quickly.

Maximize Investment: With Rackspace PCF-as-a-Service, there is no need for costly emergency IT consultants or a team of specialized PCF talent. Rackspace experts are available 24x7x365 to immediately address your issues, helping save both time and money.

Enhanced Security: PCF's comprehensive and built-in security features are coupled with proactive patching and monitoring by Rackspace, meaning your software and security are always up-to-date.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- 2018 Pivotal Managed Service Provider Partner of the Year
- A leader in the 2018 Gartner Magic Quadrant for Public Cloud Infrastructure Managed Service Providers, Worldwide
- Hosting provider for more than half of the Fortune 100
- 3,000+ cloud experts
- 30+ data centers across five continents
- 20+ years of hosting experience
- Customers in 150+ countries
- Industry-leading service level agreements

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Key Features

Rackspace Managed Pivotal Cloud Foundry offers a range of robust features to support your organization including:

Comprehensive Management: Rackspace will get you to “Day 2” quickly, providing complete management and operation of PCF, including failure troubleshooting, managing upgrades, feature releases and integrating various services with PCF (e.g., MySQL, Redis, Rabbit MQ).

Platform Agnostic: Rackspace multi-cloud certified professionals support all leading public and private clouds, including AWS, Google Cloud Platform™, Microsoft® Azure®, OpenStack®, VMware® and in-house infrastructure.

Expertise on Demand: In-house Pivotal expertise can be expensive and hard to find and maintain. Rackspace gives you easy, 24x7x365 access to Pivotal experts who are always up to speed on the latest features and optimization opportunities. They deliver 15-minute live response times to emergency tickets — without the high cost of emergency IT services.

Industry-Leading SLAs: Reduce the risk and costs of unplanned downtime with a 99.99% PCF API Uptime Guarantee.

Efficient Scalability: Rackspace has extensive experience scaling enterprise infrastructures and deep knowledge around best practices for scaling your workloads across clouds.

Proactive Account Management: Issues are prioritized and resolved quickly with a team that is familiar with your specific architecture and goals.

Take the Next Step
