

Rackspace Application Services for Microsoft Business Intelligence

Get more insight from your data.

How confident are you that your business is extracting maximum value from the data it generates? If you aren't fully utilizing important information generated within your organization, you could be missing out on opportunities to apply this business intelligence (BI) to improve your business processes and reduce your operating costs.

Rackspace can integrate Microsoft® BI technologies with your existing systems to deliver enterprise analytics — and help you use them to gain valuable insights from your business data.

Experts Dedicated to Your Success

As a Microsoft Gold Partner and five-time Hosting Partner of the Year with over 2,000 Microsoft certifications worldwide, Rackspace has the experience required to implement, manage and support your Microsoft BI solutions, including:

- Data warehouse design and development
- Data integration, quality and management
- Dashboards, analysis and reporting

Rackspace can also manage and support Microsoft SQL Server for you, to optimize performance and improve operational efficiency — saving you time and money.

Key Features and Benefits

Managed Infrastructure: Enjoy flexible hosting options for your Microsoft BI applications and choose the solution that meets your business requirements for a scalable infrastructure:

- Fully managed dedicated servers (in a Rackspace data center)
- Single-tenant private cloud (in your own data center, or a service provider's)
- Dedicated server connected to a private or public cloud (hybrid cloud)

Rackspace managed hosting services include servers, operating systems, storage, backups, networking and security.

Managed Applications: Rackspace expertise extends beyond infrastructure to the Microsoft applications your business uses every day. Leverage industry-leading expertise to manage — and provide on-going support for — your Microsoft BI applications.

Rackspace supports you by:

- Offering best-practice guidance
- Implementing and supporting features and functionality
- Answering questions, troubleshooting and resolving issues

Managed application services for Microsoft include functional support for business processes, customization, consulting and database administration.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2019 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 3,000+ cloud experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 150+ countries
- Microsoft Gold Partner
- Five-Time Hosting Partner of the Year
- 2,000 Microsoft certifications worldwide

"Rackspace has helped raise the bar in the design and deployment of customized, integrated Microsoft solutions — helping enterprises manage their Microsoft technologies in a public, private, hybrid or multi-cloud environment. [Their] technical experts are deeply involved from assessment, initial design, to migration and ongoing management."

Mark Rice :: General Manager of Partner Development, Microsoft

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Customized Solutions: Certified experts are always available to help you customize your Microsoft BI solution and work with you to:

- Assess ways to architect and optimize your solution
- Define key metrics and analytics to measure and report on
- Create a strategic roadmap for implementation

New Implementations: The Microsoft-certified experts at Rackspace can help you with everything from BI solution design to metric tuning and analysis.

Rackspace will streamline the analytics process so you can discover efficiencies within your business and find meaningful patterns in your data.

Patches and Upgrades: Offload development tasks related to applying fixes and performing upgrades for your Microsoft BI solution and Rackspace will make sure everything continues to work as intended, enabling your IT team to focus on higher-value activities and more strategic initiatives.

Take the Next Step

Let's talk about how Rackspace and Microsoft BI technologies can help you gain valuable insights from your business data.
