

Rackspace Multicloud Security Solutions

Experts dedicated to solving your complex multicloud security challenges.

The constant evolution of cyberthreats, and the race for more sophisticated tools to combat them, has resulted in a security landscape that changes quickly. Now more than ever, it is critical to understand your vulnerabilities and assemble the right solutions to strengthen and secure your environments. And the best way to do that is through the implementation of a cutting-edge security program focused on continuous improvement and backed by deep expertise.

Experts Dedicated to Your Success

Rackspace Technology has been helping organizations like yours strengthen security for more than 20 years. Rackspace multicloud security experts have deep knowledge and experience in both IT security and cloud security, and hold 800+ security-industry certifications — including 100+ cloud security certifications from AWS, Microsoft® Azure® and Google Cloud Platform™.

Serving as an extension of your security team, Rackspace Technology can help you rapidly migrate to the cloud, address your compliance requirements and ultimately remediate threats before they impact your business.

Key Features and Benefits

Provide your business with a modern, full-service security solution that partners with you every step of the way in your cloud journey to assess your current posture against industry benchmarks and then define the right strategy based on your goals. Rackspace Multicloud Security Solutions include:

Rackspace Elastic Engineering for Security: Transform your cloud security operations with a dedicated pod of certified security experts who work as an extension of your team to architect, engineer and manage your security and compliance solutions.

Advanced Monitoring & Resolution for Security: Always-on security technology health monitoring, support and help desk.

Security Technology for Defense in Depth: Leverage a broad portfolio of industry leading security technologies to secure your infrastructure from the cloud, down to the network, application and data layers. These technologies can be managed by you or via expert services from Rackspace Technology.

Professional Services: Working closely with your key stakeholders, Rackspace Technology assesses your current security posture, organizational capability, compliance requirements and desired future state, then works with you to plan, design, develop and implement a strategy based on your organization's needs.

Take the Next Step

Let's talk about how Rackspace Technology can help you secure your multicloud environment.

"We've already seen how quickly the threat landscape can change. Right now, for instance, we've seen an increase in the use of imitation sites and impersonation attacks, as well as a lot of phishing attempts. Having a partner like Rackspace Technology to work with gives us the assurance that we will be prepared for anything."

Caroline Abbondanza :: Group CTO, Brooks MacDonald

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.
