DevOps Advisory Workshop

Providing DevOps and application architectural solutions.

Organizations want to deliver quality application features faster and with greater agility, but getting there can be a challenge. With Rackspace DevOps Advisory Workshops, you'll gain a clear path to your business goals. Through collaborative sessions, your Rackspace® team will assess your objectives, pain points, architectures, application and platform delivery process, organization culture and monitoring capabilities — and provide recommendations and strategic roadmaps to help you reach your goals.

Experts Dedicated to Your Success

When you choose Rackspace DevOps services, you'll work with specialists behind industry-leading products for managed cloud, security, web platforms, databases, containers, email and collaboration apps, disaster recovery and IT transformation. Rackspace has expertise to work at scale across all the leading public and private clouds for Amazon Web Services, Microsoft®, OpenStack® and VMware®. Rackspace experts work with you one-on-one, at your location — learning from your SMEs, getting a clear picture of your current and desired states, and brainstorming new solutions.

Key Benefits

Rackspace expertise covers a wide range of industry-leading solution areas including:

- Infrastructure automation (AWS CFN, OpenStack® Heat, VRealize Orchestrator, Chef, SaltStack®, Ansible®, DSC, etc.)
- CICD tooling (TeamCity, Jenkins, Bamboo, etc.)
- Patterns for packaging and deploying various types of applications (J2EE, IIS, CMS, etc.)
- Development SCM branching strategies
- Successful patterns of DevOps adoption across teams
- CICD (Continuous Integration/Continuous Delivery) process flows
- Automated testing strategies
- Application architecture

Workshops

Select the workshop that matches your project's scope and level of complexity — Simple, Complex or Custom.

Simple Workshop: For customers who have straightforward applications using standard, popular stacks (Apache®, Nginix, ROR, J2EE, Python, Memcached, Redis, Rabbitmq, etc). Also, ideal for companies who already have an idea about how they'd like to solve their technical challenges, but need help filling in the gaps and validating the execution details.

Duration: Up to 3 days

Price: $15,000

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2018 Gartner Magic Quadrant for Public Cloud Infrastructure Managed Service Providers, Worldwide

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

rackspace

Complex Workshop: For customers who have relatively complicated application stacks and software delivery practices. Also, ideal for companies who need assistance choosing the best route to address their technical challenges.

Duration: Up to 5 days

Price: $25,000

Custom Workshop: For customers who have very complicated application stacks and software delivery practices. Also, ideal for companies who have multiple business units with varying applications, processes and practices. Tailored agenda may include demos and training sessions.

Duration: Varies

Following your workshop, you will receive a DevOps Assessment Report that includes:

• Audit of current state

• Recommended strategies for achieving business objectives and eliminating pain points

• Roadmap of activities needed to move from current state to goals

• Detailed list of services that Rackspace can provide to assist in this transformation

Services Delivered Your Way

The following additional services can help you accelerate your DevOps journey:

DevOps — On Demand: A platform- and tools-agnostic offering with services available on a host of platforms (Dedicated, AWS, VMWare, OpenStack, Hyper-V) using a host of technologies (Chef, Salt, DSC, Jenkins, TeamCity, Octopus Deploy, Bamboo, etc.). This platform is ideal for organizations that need Infrastructure automation and CICD (Continuous Integration/ Continuous Delivery) flows implemented.

DevOps — Maintenance Plan: Collaboration on changes to your environment, including expert advice and handling of infrastructure automation and CI/CD configuration change implementations. Ideal for organizations that need ongoing maintenance for their infrastructure automation and CICD projects, and for organizations not interested in investing internally on that expertise.

Take the Next Step

Let's talk about how Rackspace DevOps expertise helps you achieve your goals.
