

Rackspace Healthcare Solutions Powered by Pure Storage

Managed services and support for HIPAA-ready cloud workloads across private and multi-cloud environments.

The Rackspace Ultra-fast Performance Dedicated Block Solution is ideal for high-performance, mission-critical workloads, clinical apps, advanced analytics and mobile apps and tools that help improve the quality of care while making providers more productive.

Rackspace Healthcare Solutions leverage an ultra-fast performance Dedicated Block Solution for your mission-critical clinical workloads where performance cannot be compromised.

Experts Dedicated to Your Success

Focus your resources on core competencies while Rackspace handles your storage needs. Your business is backed by always-on support and block-storage expertise.

As a HITRUST™ CSF-certified organization, Rackspace helps your healthcare organization reach its digital transformation goals while maintaining the highest levels of data and privacy standards.

Key Benefits

Healthcare organizations look to Rackspace for help addressing security and compliance challenges, engaging with patients, optimizing operations, planning for business and clinical continuity, and gaining deeper insights from their data. Rackspace Ultra-fast Performance Dedicated Block Solution help these organizations by providing:

Ultra-fast performance: Power your analytics processes with best-in-class Pure Storage® NVMe FlashArray™ products. Generate results quickly as you work to predict and prevent chronic diseases, deliver precision medicine, map genomes and manage population health.

Security, compliance and risk mitigation: A HIPAA-ready cloud and HITRUST CSF certification helps you address your compliance needs, including PCI DSS and PHI requirements. The Purity Operating Environment secures data at rest with AES 256-bit encryption. Pure's data storage security measures meet the highest standards, including FIPS 140-2 data encryption.

Managed services: With end-to-end managed services across private and multi-cloud environments, you can move from a capex to an opex spending model while freeing your staff from the burden of routine maintenance so that they can innovate.

Digital transformation: Leverage a next-generation data-centric architecture that makes data available across the integrated delivery network. This can help you improve patient engagement, respond quickly to business challenges, accelerate business processes through application development, enable virtual health solutions and engage patients through care compliance, clinical trials and social networks.
