

Rackspace Managed Security Solutions: Quickstart for Network Protection

Defend your full infrastructure stack against threats and unauthorized access.

Quickstart for Network Protection is a pre-designed solution that accelerates the adoption of network security technology. By identifying and logging all unauthorized system activity, the solution protects your entire infrastructure from malicious intrusion. Built with IDS, vulnerability scanning, multi-factor authentication and log management technology, the solution defends against malicious activity and detects suspicious events across your environment.

Experts Dedicated to Your Success

The Rackspace Managed Security portfolio is built on 250+ years of collective expertise. Rackspace leveraged this experience into an intelligent solution that cost-effectively streamlines technology adoption.

The solution provides fully managed provisioning of your infrastructure, including failover, backups, monitoring and expert-led training. You won't have to spend time deciding which tools are right for you or recruit expensive expertise. With Quickstart for Network Protection, you can focus your efforts on proactively protecting your network and infrastructure.

Key Benefits

Quickstart for Network Protection provides a ready-to-go security solution tailored to your business objectives and protection requirements benefits include:

Solution customization: Tailor-made solutions built around your business requirements, existing technology and coverage needs.

Managed provisioning: Coordination with leading technology partners to license, provision and configure the solution for your environment.

Onboarding and handoff: Documentation and training to provide you with the capabilities necessary to control your security outcomes.

Environment scoping: Proactive planning to address security coverage as your footprint evolves over time.

Notification and reporting: Ongoing security assessments to maintain your security posture.

Key Features

Quickstart for Network Protection combines the following features into a comprehensive network security package:

Intrusion detection: Includes network protection and event filtering.

Multifactor authentication: Protects and validates user identities.

Log management: Aggregates logs and highlights potentially anomalous users or system activity.

Optional DDoS mitigation: IP- or DNS-based protection from Layer 7 and volumetric network attacks.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2019 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 3,000+ cloud experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 150+ countries

"Our goal was to find a technology partner who would not only help us serve our existing needs and address our current vulnerabilities, but also someone who would work with us to help anticipate technology changes."

David Holmes :: CEO, Santikos

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Take the Next Step
