

Managed Redis Powered by ObjectRocket

Solve complex data challenges at scale with Rackspace Data Services.

Rackspace Data Services can help a business of any size initiate, optimize and manage Redis, while offering guidance on scaling, complex migrations and other common challenges.

Let Rackspace help your organization simplify the development of your environment, while reducing labor costs, by providing scalable, production-ready Redis and cost-efficient access to operational expertise.

Experts Dedicated to Your Success

Rackspace hosts and manages all the leading clouds, such as Amazon Web Services (AWS), Microsoft® Azure®, Google Cloud Platform™ and OpenStack®.

ObjectRocket, a Rackspace company, supports over 50,000 Redis instances — ranging from simple development projects to critical production workloads — for businesses around the world, all tuned by specialists who know how to get the most out of Redis.

Key Benefits

Rackspace Data Services delivers essential benefits to Redis operation including these.

Data expertise: Rackspace manages over 50,000 database servers on the most popular cloud platforms, based on experience in database design, optimization and support across leading data technologies, including Redis.

Lower TCO: According to a study by Crimson Consulting Group, companies spend 467% more when they deploy and manage Redis on-premises rather than using a Rackspace managed solution (on average, over a three-year period).

Speed and flexibility: Rackspace manages petabytes of customer data, enabling billions of operations daily. You get the benefit of on-demand provisioning across a variety of configurations and data sizes, while paying only for what you need.

Cost savings: You'll get constant access to the latest technologies without the worry of obsolescence or the need for additional IT expenditures.

Key Features

Rackspace Data Services includes key features that ensure optimized performance of your Redis operations.

Easy scalability: On-demand provisioning and simple configuration and administration processes make it easy to integrate Redis into your application stack and scale as your business grows.

Built-in high availability: Rackspace provides fully redundant infrastructure from the network all the way up the stack with built-in automatic failover.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2019 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 3,000+ cloud experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 150+ countries

“Having partners like Rackspace helps us sleep better at night. We don't have to worry about it. We know there are people there and if there's a problem, they'll take care of it.”

Brandon Karcher :: DevOps Manager, Excentus

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Persistence: To help ensure persistence of your data, your Rackspace support team has access to a daily RDB snapshot of your database. For a finer level of persistence, you can enable Append Only File (AOF) to record every change.

Robust security: Each solution includes an integrated firewall, per-instance network ACLs, SSL encryption and user-based authentication to help ensure encryption in transit.

Take the Next Step

Let's talk about how Rackspace can help you solve complex data challenges at scale.
