

RackSpace Database Solutions Powered by Pure Storage

Providing fully-managed services and support for database environments on NVMe-based Ultra-Fast RackSpace Dedicated Block Solution.

RackSpace removes the complexity of migrating, architecting, hosting and maintaining your databases. RackSpace certified DBAs provide the deep expertise you need to manage and optimize the performance of enterprise applications such as:

- SAP
- PostgreSQL
- Cassandra
- SAP HANA
- Oracle®
- Couchbase
- MySQL®
- Microsoft® SQL Server®
- MongoDB®

RackSpace Database solutions, leveraging the Ultra-Fast Dedicated Block Solution powered by Pure Storage FlashArray™, ensure that you get best-in-class performance with low latency.

Experts Dedicated to Your Success

Ultra-Fast performance RackSpace Block service is ideal for high performance mission-critical databases, advanced analytics, and mobile apps/tools requiring fast, consistent performance with enterprise-rich data services.

Key Benefits

RackSpace addresses the performance, scalability and reliability challenges your complex databases face. Whether it's web and mobile applications, eCommerce security or compliance challenges, RackSpace Database solutions provide you with rapid and predictable performance.

Ultra-Fast Performance: Leverage Pure Storage® NVMe FlashArray products to provide databases with the fast data access, high availability, and low latency storage that help you deliver fast querying, reporting, transactions and read-writes.

Security and Compliance: The single-tenant infrastructure and Purity Operating Environment secures data at rest with AES 256-bit encryption. Pure's data storage security measures meet the highest standards (including FIPS 140-2 data encryption) to help you address your security and compliance needs.

Database Scaling and Optimization: Offload routine tasks to RackSpace DBAs so you can focus on your core business priorities. RackSpace will take care of tasks such as provisioning, resizing of new instances, performance tuning, issue diagnosis and query performance detection and analysis.

Data Protection, Disaster Recovery and Data Continuity: Get peace of mind that your data is protected by active-active synchronous and asynchronous cluster replication, mirroring, snapshots, nearly instantaneous restores and backups.

High Availability: Powered by best-in-class Pure Storage FlashArray with a RackSpace guarantee of 99.99% availability.

Services Delivered Your Way

RackSpace has a long history of managing and protecting data for organizations around the world, and yours can benefit from always-on support and expertise.
