

Enterprise Application Services For Winshuttle Implementation & Hosting

Improve data management processes with help from our Winshuttle Studio and Foundation experts.

Winshuttle software empowers business teams to make an impact through solutions that make it quick and easy to exchange data with SAP using Excel, streamline SAP business processes using forms and workflows, and improve data quality using data stewardship capabilities.

With help from Rackspace, you can use Winshuttle to help simplify and streamline SAP data management, drive efficiencies across your organization and begin to realize the full business value of your ERP system.

Experts Dedicated to Your Success

Rackspace consultants are experts with Winshuttle Studio and Foundation. Using the Rackspace rapid implementation philosophy, they are able to respond to implementation requests at short notice, helping to minimize business disruption, reduce costs and help you realize a return on your investment more quickly.

Key Benefits

Winshuttle's business-led, IT-enabled solutions enable users to automate processes and solve problems without compromising security or governance. Business teams can author solutions across lines of business and the SAP landscape, which, in turn, can speed product launches and financial accounting processes. Winshuttle can also help to streamline customer and vendor onboarding, improve plant maintenance efficiency, and tackle data projects like S/4HANA migrations and SAP-centric robotic process automation initiatives.

Automate and streamline any SAP business process with the following:

Data Movement and Integration: Empower business users to rapidly exchange data in and out of SAP with Excel. Improve productivity by reducing repetitive manual tasks, freeing up teams to work on higher value tasks.

Workflow Applications: By maximizing the velocity of data management and automating business processes across the enterprise, entire data workflows can be streamlined and managed without burdening IT resources. Winshuttle gives you the ability to replicate and deploy powerful applications, reduce the need for multiple manual processes and create better transparency throughout your organization.

Data Governance: Winshuttle's platform helps you trust your data again. By adhering to each company's SAP and security requirements, Winshuttle solutions provide checks and balances that help ensure accuracy and transparency, giving you the visibility to identify process inefficiencies before they cause missed shipments, delayed invoicing or inaccurate reporting.
