

# Rackspace Service Blocks: Platform Essentials for Google Cloud Platform

Manage your accounts and user permissions in a consolidated control panel with around-the-clock ticketed access to Rackspace cloud experts.

As a leading cloud services provider, Rackspace understands that no two cloud journeys are the same. Cloud support and management requirements vary from organization to organization. Rackspace Service Blocks™ allow the specialized teams at Rackspace to meet you exactly where you are on your cloud journey, providing the exact solutions required to address your unique needs.

## Why Rackspace for Platform Essentials for Google Cloud Platform?

All Rackspace customized service offers start with Platform Essentials, which provides around-the-clock access to cloud expertise, tooling for deep insight into your Google Cloud Platform environment, and a consolidated control panel for simplified management of users and accounts. You can easily combine Platform Essentials with other service blocks to address additional needs as your requirements evolve over time.

### Key Features

**Account and User Management:** The Rackspace consolidated control panel allows for easy, single-pane-of-glass management of multiple accounts. You can also define and manage user roles and permissions across your organization.

**Always-on Support:** Rackspace has enabled countless custom deployments, solved challenges for customers across every industry, and maintains partnerships with leading vendors and providers. With deep cloud experience and expertise, Rackspace is prepared to help solve your biggest challenges. Platform Essentials provides guidance and support for your public cloud issues and questions.

**CloudHealth** (*Coming soon*): Industry-leading tooling helps generate automated analysis, reporting and recommendations for cost reductions and increased efficiency of your cloud infrastructure.

**Prioritized Escalations:** Critical issues are escalated to priority status at Google support.

**Add-On Services:** Build customized cloud services by adding available offers, including Architect & Deploy, Discover & Enhance, Manage & Operate, and Complex Cloud Operations.
