

# Rackspace Service Blocks for Google Cloud Platform

Pay only for the specific services and solutions you need during each phase of your Google cloud journey.

No two cloud journeys are the same. Organizations often have varying requirements across teams, business units and applications, with multi-cloud strategies adding to this complexity. Cloud management needs also change and shift as businesses navigate cloud adoption.

Rackspace Service Blocks™ allow you to get the exact cloud solutions you need at any point on your journey with Google Cloud Platform™. Service blocks provide the flexibility to change or grow cloud services as your needs change, adding maximum value by delivering only the services and support you want and need the most.

## Why Service Blocks for Google Cloud Platform?

Rackspace is a next-generation managed service provider, helping customers navigate their journey to the cloud and accelerate their digital transformation. A team of certified Google Cloud Platform experts delivers expertise, optimization and unmatched support for your entire cloud lifecycle.

## Key Benefits

**Customization:** Service blocks are designed to support specific cloud needs such as migration, deployment, operational support, automation and cost governance. Easily select and combine service blocks to build customized solutions to meet varying needs across your organization.

**Flexibility:** As your cloud needs grow or shift over time, Rackspace will work with you to add, change and customize service blocks according to your Google Cloud Platform requirements.

**Maximized value:** Rackspace delivers the specific cloud services and support you need, helping reduce unnecessary cloud management costs by focusing exclusively on the outcomes that are most critical to your business.

## Service Blocks

Choose from the following Rackspace Service Block offerings for Google Cloud Platform:

**Platform Essentials:** Easily manage your accounts and user permissions in a consolidated control panel. Extend cloud support with 24x7x365 ticketed access to Rackspace cloud experts. Reduce costs, improve reliability and add security and redundancy across your public cloud infrastructure with industry-leading tooling and automated analytics reporting.

**Architect & Deploy:** Certified cloud architects design, build and deploy your cloud infrastructure to meet your specific requirements, leveraging cloud architecture best practices for optimal performance and reliability.

## About Rackspace
