

Rackspace Application Services for Sitecore

Gain proven Sitecore solutions to help shift your focus back to thrilling your customers.

Cutting-edge digital experience platforms can deliver a powerful competitive advantage, but implementing and maintaining them is often difficult, expensive and time-consuming. Managing, monitoring and optimizing digital experience apps can also prove challenging. How rapidly can you deliver new deployments? How do you know when you're delivering an optimal customer experience? What can data tell you about your customers?

Rackspace® Application Services for Sitecore® removes the complexity of managing and optimizing your Sitecore applications through a range of architecture, hosting and monitoring services. Rackspace can deliver intelligent and actionable insights into your Sitecore applications while providing easy access to specialized support options. You get access to your choice of performance management and insight tools across leading solutions from Sitecore including Sitecore Experience Manager and Sitecore Experience Commerce. You can also take advantage of a range of deployment and infrastructure options to manage & optimize the infrastructure, application and security you need for your digital experience platforms, including Microsoft® Azure® PaaS or IaaS, and AWS or private cloud.

Experts Dedicated to Your Success

Rackspace Application Services for Sitecore will help you build a reliable, secure and compliant application environment that offers the flexibility and agility you need as you speed to market with new deployments and upgrades. Rackspace offers cost-efficient, optimized IT benefits and unbiased expertise with a "Process First. Technology Second®." approach across an unrivaled portfolio of the leading digital experience platforms.

Key Features
