

Rackspace Threat Management Services

Improved threat detection with increased visibility into cloud and host-based vulnerabilities in your environment.

Companies spend a significant part of their time and budget on breach prevention and access control technology and processes. This leaves less time to get visibility into deployed assets, misconfigurations and software vulnerabilities. Adding to this, monitoring threats is a continuous process and qualified security staff are expensive and difficult to retain.

Implementing and maintaining security tools yourself is financially daunting and requires skilled resources to interpret and prioritize data.

Experts Dedicated to Your Success

Rackspace offers customers always-on threat management services built on the Alert Logic security platform.

With hundreds of networking and security experts certified in cyber defense, digital forensics, incident response, penetration testing and networking, Rackspace is your best bet to reduce the risk of threats to your hybrid cloud environments.

Key Benefits

Alert Logic Threat Management services combine network intrusion detection system, vulnerability management, log management, threat intelligence based on industry data and expert research, machine-learning data for real-time alerting, incident verification, and remediation guidance.

Alert Logic Threat Management Services at Rackspace include the following:

- A consultation with a certified security engineer to assess and architect your threat management platform based on your security requirements
- With the Alert Logic Essentials offering from Rackspace, you get vulnerability and asset visibility with extended endpoint protection. Automatically track change and posture status across your infrastructure and platforms and, intelligently block attacks through a combination of machine-learning attribute analysis and real-time behavior analysis.
- With the Alert Logic Professional offering from Rackspace, you get all the benefits of the Essentials offering (see below) plus an intrusion detection system with 24x7x365 incident response and remediation from certified security experts.

Key Features

With multiple layers of analytics, security expertise and threat research, there's no limit on which threats Rackspace can detect – from common threats affecting workloads including malware, brute force, system level attacks, to privilege escalations.

About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2019 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- A Major Player in the 2019 IDC MarketScape for Emerging Managed Security Service Providers, U.S.
- 3,000+ cloud experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 150+ countries

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

| Alert Logic Threat Management Services from Rackspace | Essentials | Professional |
