

SOLUTION OVERVIEW

RACKSPACE MANAGED BACKUP

Keep your mission-critical data safe and secure.

You don't have to invest in costly onsite expertise to avoid the risk of data loss due to corruption or hardware and software failures. Rackspace Managed Backup service offers fully managed, multi-tenant backup and recovery service for dedicated physical servers, virtual servers, applications and databases hosted in Rackspace data centers.

WHY RACKSPACE FOR MANAGED BACKUP?

Refocus your staff on strategic initiatives while protecting mission-critical data with backups from Rackspace. With our scale and expertise, you can decrease large, upfront capital expenditures, reduce talent acquisition costs, and more easily forecast monthly operational expenses.

We offer a complete range of backup options to help you reduce impacts on production, including snapshot-based backups, weekly full backups, and daily incremental backups.

KEY FEATURES

Rackspace Managed Backup includes:

- **Managed Backup and Recovery Service:** Focus on your own strategic initiatives without having to be an expert in backup and recovery.
- **Enterprise-class data protection:** Gain enterprise-sized benefits without an enterprise-sized investment.
- **Encrypted managed backups (optional AES 256 encryption):** Address security and compliance needs by encrypting your mission-critical data.
- **Protection for leading applications:** Choose the protection that's best for your environment. We support Microsoft® SQL Server®, MySQL®, Oracle®, Microsoft Exchange, VMware® and Hyper-V® environments.
- **Onsite disk-based backups:** Minimize downtime in the event of localized failure or data corruption.
- **Offsite backups:** Protect data from the impact of a local catastrophe.
- **Long-term data retention:** Address data retention and compliance requirements
- **Any-time recovery:** Recover data 24x7x365.
