

AWS CLOUD AUTOMATION

Build and deploy resilient AWS cloud applications at scale.

Rackspace offers flexible services and tooling to build and deploy resilient Amazon Web Services (AWS) cloud applications at scale. As an AWS Premier Consulting Partner with a DevOps Competency, we can rapidly and reliably build and deliver products using AWS and DevOps best practices.

WHY RACKSPACE FOR AWS CLOUD AUTOMATION?

Many organizations want to automate their application workloads on AWS but lack the resources and expertise to do so. Our AWS-certified architects and engineers have years of experience leveraging AWS best practices to guide clients on the complex journey to the AWS cloud. We'll work with your team to accelerate time to market by optimizing your development processes and developing the necessary AWS tooling and integrations.

KEY FEATURES

AWS Cloud Automation provides customized application deployment strategies and tooling to increase the speed, quality and efficiency of your application delivery.

Infrastructure Automation: We utilize a DevOps approach and infrastructure-as-code principles to automate your entire cloud infrastructure, increasing the speed, consistency and quality of your cloud provisioning.

Application Deployment: We employ best practices to provide a well-architected AWS environment, including use of AWS native services to help automate your application deployment.

Continuous Integration/Continuous Delivery (CI/CD): We'll help you reduce time-consuming tasks and human error by implementing your development and deployments under the AWS CI/CD model. We can increase your release velocity while establishing a consistent, repeatable deployment process.

Third-Party Configuration Management: We support third-party tools – Chef, Ansible, SaltStack, DSC and more – to help ensure consistency across servers and environments and add deployment flexibility. We also provide compliance and governance support.

EXPERTISE

Our certified AWS experts are equipped to guide you and help you meet your specific goals.

- **EXPERIENCE WITH ALL LEADING PLATFORMS** At Rackspace, we have the expertise, easy-to-use tools and results-obsessed customer service to support your workloads at scale across all the leading public and private clouds, including AWS, Microsoft®, OpenStack® and VMware®.
- **TEAMS OF SPECIALISTS** We employ teams of experts who specialize in managing cloud infrastructure, security, web content platforms, databases, containers, email and collaboration apps, disaster recovery, and IT transformation.
- **AWS QUALIFICATIONS** Rackspace AWS qualifications include: AWS DevOps Competency, AWS Marketing & Commerce Competency, Premier Consulting Partner in the AWS Partner Network, Audited Managed Service Partner, and AWS Reseller
- **SECURITY CERTIFICATIONS** Rackspace certifications include: ISO 27001:2005; Level 1 Payment Card Industry (PCI) Service Provider; SSAE16 Type II SOC1, SOC2 (security and availability only) and SOC 3; and CDSA Content Protection and Security Standard.
- BAA for HIPAA

SERVICE

We deliver **Fanatical Support**® for the world's leading clouds – it's the specialized expertise and 24x7x365, results-obsessed customer service that's been a part of our DNA since 1999.
