

# Application Integration Service

Implement your integration strategy with Rackspace.

With a clear view of the application integrations you need to fulfill your business strategy, Rackspace offers a service to take you where you want to go in partnership with MuleSoft, a Gartner leader in API Management and 'integration platform as a service's (iPaaS).

You know the strain that integration projects place on your business but you also know that without application integration, your data will remain in silos, your workflows will continue to require far too many manual interventions and you'll never become cloud native; you have to integrate more if you want your business to become more agile and competitive.

Fortunately APIs have made application integration easier but with the average mid-size business utilising 100s of applications, the management of all those APIs and the integrations they facilitate has become an issue in itself. Fortunately MuleSoft has developed a best in class platform to address that concern and Rackspace is the partner to implement it for you.

## What we do

Rackspace application integration experts and MuleSoft certified architects and developers will engage with your application teams to jointly develop and plan the optimum MuleSoft architecture that will deliver the integrations you need to meet your business goals.

They will start by reconfirming your desired outcomes and key business objectives then work with you to define an API management strategy and architecture.

With those critical aspects defined and documented, our experts will move on to design, build, implement your MuleSoft solution and then load the required APIs from partners and exchanges. The solution will then be configured to provide the desired application integrations.

## What you get

By partnering with Rackspace, you will get

- a documented API architecture
- a documented API management process
- Integrated applications and data

The outcomes of our Application Integration Service for you are

- an API strategy
- an API management architecture based on MuleSoft
- full API lifecycle management processes on a single platform

## About Rackspace

Rackspace is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2019 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 3,000+ cloud experts
