

# RACKSPACE CLOUD MATURITY WORKSHOP

*A smarter way to draw your roadmap to the cloud.*

It's a multi-cloud world. When it comes to public, private and hybrid cloud models, one size does not fit all – especially as your application portfolio diversifies. If you're looking to move to the cloud but aren't sure where to start, Rackspace can help.

With our Cloud Maturity Workshop, Rackspace architects will evaluate an agreed upon set of applications. We will analyze the current infrastructure utilization, collaborate with your teams to understand the applications, and understand how they fit within your overall company strategy. We will analyze the inputs and provide you with a detailed report outlining the viability of moving the applications to the cloud, a summary of economic impacts, and a roadmap to achieve cloud adoption goals.

## WHY RACKSPACE FOR CLOUD MATURITY?

Our migration strategy is informed by our deep understanding of how legacy systems and cloud solutions interact. Our extensive operator-level experience provides the expertise it takes to support public, private and hybrid clouds across the world's leading cloud platforms. We deliver robust, long-ranging methodologies to smooth your cloud transition, whether you migrate a single application or a large portfolio. We also offer tested, reliable tools to help you with application inventory, assessment, migration, planning and execution.

## KEY DELIVERABLES

The Rackspace Cloud Maturity Workshop offers expertise and best practices for accelerating cloud transformation. Key activities and deliverables include:

**Transformation feasibility study:** We'll develop a deep understanding of your current state, transformation objectives and future goals.

**Concrete transformation roadmap:** Based on the study, we'll lay down a roadmap sequencing your transformation journey, along with recommendations and next steps.

**Cloud maturity assessment and heat map:** We'll prepare a cloud maturity report and heat map covering people, processes and technologies.

**Gap analysis:** We'll detail the resources and technology you'll need on your journey to the cloud.

**Prescriptive solutions and services roadmap:** After the workshop, we'll analyze your information and deliver a map to the cloud tailored to your specific needs.

## TRUST RACKSPACE

- A leader in the 2017 Gartner Magic Quadrant for Public Cloud Infrastructure Managed Service Providers, Worldwide
- 3,000+ cloud experts
- Hosting provider for more than half of the Fortune 100
- 16+ years of hosting experience
- Customers in 150+ countries

## KEY BENEFITS

Our Cloud Maturity Workshop delivers the following benefits:

**Insight into your current state:** Get a true picture of your current governance, security and compliance requirements.

**Reduced risk and complexity:** A comprehensive roadmap will minimize the risk, complexity and burden of identifying needs to move to the cloud.

**Forward-looking strategy:** Our strategic transition approach focuses on creating sustainable cloud operations.

**Leading methodologies and best practices:** We offer industry-leading best practices, transition methods and recommendations to maximize your cloud investment.

**Training and certifications:** The workshop is an opportunity to build on existing skills, training and certifications for your team.

**Optimized processes:** Learn how to break down silos and optimize provisioning, end-to-end services and cloud-based processes.

**Cross-functional teams:** Learn to incorporate cross-functional teams to support end-to-end services, create new governance and compliance models, and effectively integrate DevOps.

**Access to industry-leading expertise:** Work with senior IT transformation architects, senior solution architects and business analysts.

## EXPERTISE

Rackspace has the expertise to support public, private and hybrid cloud configurations across the world's leading cloud technologies.

- Hundreds of certifications in AWS, Microsoft®, VMware®, Cisco®, Red Hat® and more
- Co-inventor of OpenStack® and operator of the world's largest OpenStack public cloud
- 18+ years of helping customers move beyond traditional data centers
- 1,000 business and technical professional accreditations
- 230 associate solution architect certifications
- 20 professional solution architect certifications

## SERVICE

We deliver **Fanatical Support®** for the world's leading clouds – it's the specialized expertise and 24x7x365, results-obsessed customer service that's been a part of our DNA since 1999.

## PRICING

**Duration:** 2 Days

**Cost:** \$25K
