

RACKSPACE STORAGE AREA NETWORK

Fully managed, highly available storage with a 99.999% uptime SLA guarantee for quick provisioning and pay-as-you-grow scalability.

Rackspace managed storage area networks (SANs) enable low-latency, high-bandwidth connections to your data, without the hassle of maintaining infrastructure as your storage needs grow. Our managed SAN solution is the ideal fit when you need reliable block storage for quick provisioning, backed by a fully redundant architecture.

WHY RACKSPACE FOR SAN?

Storage infrastructure is highly complex, and that complexity can increase as your storage needs grow and storage technologies evolve. Rackspace delivers a fully managed storage solution designed to solve storage complexity and satisfy your unique requirements.

KEY BENEFITS

At Rackspace, we design SAN solutions according to your unique data needs.

Quick Deployment & Scalability: Choosing SAN to handle storage enables you to deploy quickly and scale easily as your workload grows, with smart pay-as-you-grow pricing. Start as small as 100GB and grow as your business scales.

Three Performance Levels and Industry-Leading Uptime SLA Guarantee: Choose from three performance levels (Bronze, Silver and Gold), with easy pay-as-you-grow options and an industry-leading 99.999% uptime SLA.

Full Redundancy: Our SAN arrays are built for full redundancy. The two fabrics are independent of each other and provide multiple paths to the storage array, eliminating single points of failure to help ensure access to your data.

Data Security: SAN keeps your data isolated from other servers by using fabric zoning and LUN masking. Only hosts zoned to the SAN have access to the array and only authorized hosts can see the LUN and data assigned to them through LUN masking.

Enterprise-Ready Technology: We use best-in-class Dell EMC VMAX, the established leader in storage platforms.

EXPERTISE

We have a long history of managing and protecting data for organizations around the world.

- Co-founder, with NASA, of OpenStack®
- Largest OpenStack public cloud
- Leader in managing OpenStack private clouds
- No. 1 cloud provider for world's top 1,000 websites (per Internet Retailer)
- Only top-tier cloud provider partner for AWS, Microsoft® and VMware®

TRUST RACKSPACE

- A leader in the 2017 Gartner Magic Quadrant for Public Cloud Infrastructure Managed Service Providers, Worldwide
- Hosting provider for more than half of the Fortune 100
- 3,000+ cloud experts
- 16+ years of hosting experience
- Customers in 150+ countries
- Three-time winner, Dell EMC Service Provider of the Year Award (2014, 2015, 2016)

"THERE ARE MANY SMALL MOMENTS THAT AFFIRM THAT I AM WORKING WITH A GOOD PARTNER AND NOT JUST A VENDOR."
